

Contoured Arch Top *(surcharge applies)*

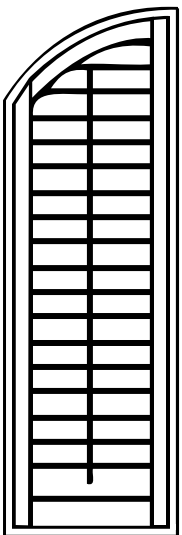

In a contoured arch the louvers go up to the top of the panel. The louvers are “cut and shaped” into the arch. Every contour arch is different and depending on the size and shape of the window some or all of the louvers operate, or some or all may be fixed, or finally, some may be operable and fixed within the arch.

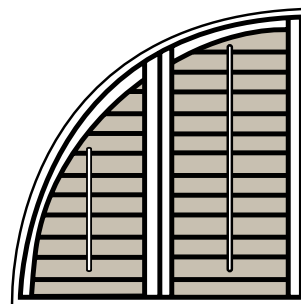

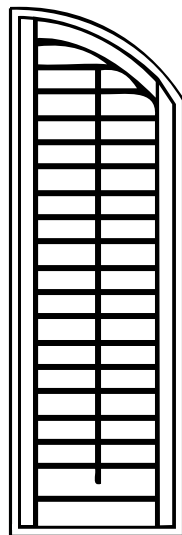

Half Circle

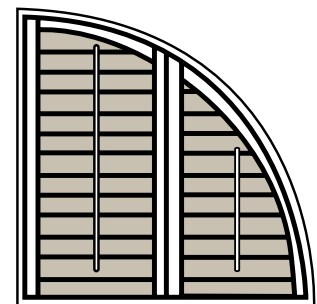

Contoured Arch - Maximum overall width 96”.
Quote for 5 panels and up or widths wider than 96”
Frame styles: 8723 L-Frame or 8796 Small-Z Frame

** The shutter design you receive may look different as compared to those depicted in these diagrams.*

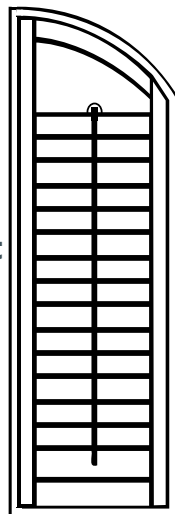

Solid-Top Arch *(surcharge applies)*

Mirasol's Solid Top Arch is a lower cost alternative to the contoured arch. It features an extra tall top rail with a maximum rise of 15 inches from the break point to the top. The top solid rail is mouse holed and the louvers below are all operable.
